This Book is brought to you for free and open access by the Information Literacy Resources at Knowledge Repository @ IUP. It has been accepted for inclusion in Lesson Plans and Rubrics by an authorized administrator of Knowledge Repository @ IUP. For more information, please contact cclouser@iup.edu, sara.parme@iup.edu.

Google Scholar Library Links are article-level links to subscription full text for patrons affiliated with a library. Follow these step-by-step instructions to link Google Scholar to the full-text access provided by the IUP Libraries.

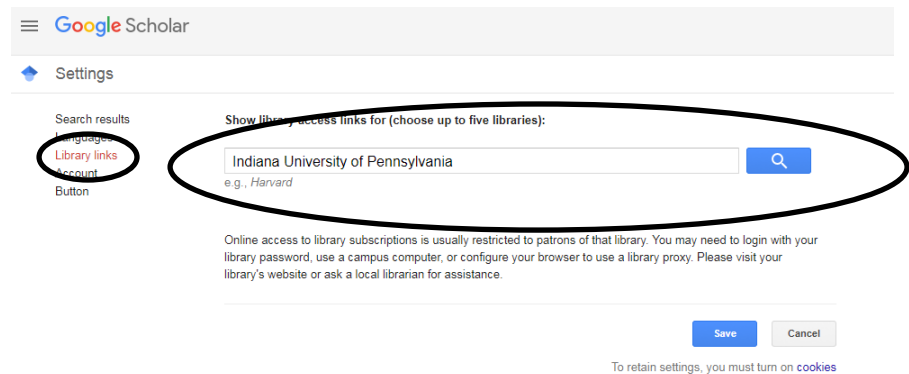

From the Google Scholar search page:

1. In the left-hand corner, click on the three horizontal lines.
2. From the menu, click on settings.

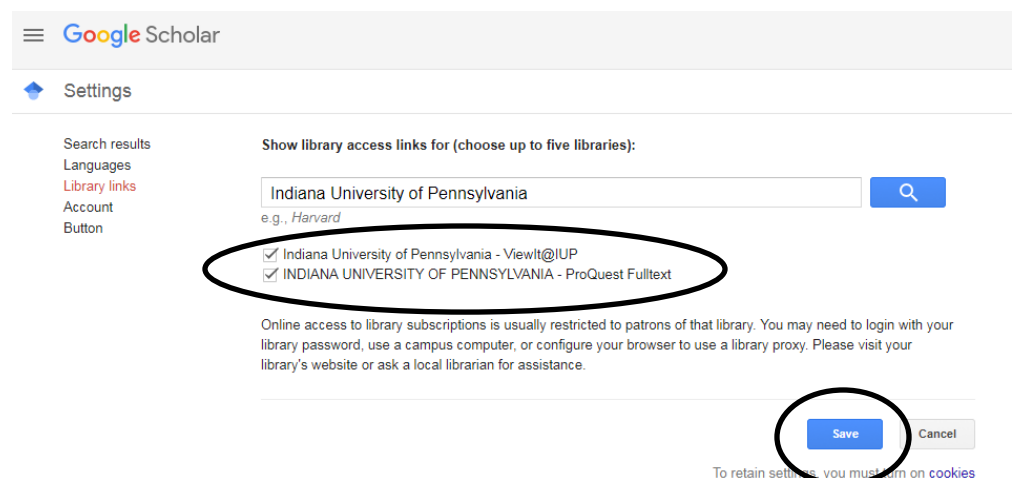

From the settings page:

1. Click on Library Links on the left.
2. Type Indiana University of Pennsylvania into the text box.
3. Click the magnifying glass.

4. Check the boxes beside both IUP selections.
5. Click Save.

From the search results list in Google Scholar, you will see links to ViewIt@IUP. The ViewIt@IUP link will provide you with the full-text of the article through the library subscription databases. If you are off-campus, you will need to sign in with your IUP username and password to get access to the full-text.

Climate change and infectious diseases: from evidence to a predictive framework

S Altizer, RS Ostfeld, PTJ Johnson, S Kutz... - ..., 2013 - science.sciencemag.org
Abstract Scientists have long predicted large-scale responses of infectious diseases to climate change, giving rise to a polarizing debate, especially concerning human pathogens for which socioeconomic drivers and control measures can limit the detection of climate-
